MEMORANDUM FOR: Chief, B2 Division/PO432, NSA

ATTENTION:

FROM: Chief, CIA/PID (NPIC)

SUBJECT: Search for Radar at Various Locations in North Korea

REFERENCE: (a) Requirement NSA/PO432/R-10/64
(b) CIA/PID Project C 179-64

1. This memorandum is in response to your requirement dated 20 January 1964 requesting a search for and identification of radars at various locations in North Korea.

2. The sixteen specific areas listed on the attached table were involved in the search. Conditions and results by mission are noted. The only radar observed was a WIFF radar at Sondok, North Korea, located at 39-48N 127-39E [REDACTED]. This radar is associated with an AAA gun battery. An SA-2 site is located at 38-45N 125-51E, sixteen miles south-southeast of P'Yo'ng Yong. It is a link configuration but the electronic equipment is not discernible due to haze and obliquity. The other areas were either not covered by photography or were negative as shown on the attached table. Obliquity and lack of adequate coverage, however, made a thorough positive search impossible. Since the missions used in the search are at least nine months old they may not reflect the present ROB.

3. The photo analyst on this project is [REDACTED] who may be contacted on [REDACTED] should you have any further questions concerning this project.

4. This project is considered to be complete.

Enclosure:
1 - Table
